SOPHIA MARY

Frontend developer with experience in writing automated test scripts and building static web pages. Take a look at [my portfolio](#).

SKILLS

HTML & CSS	★★★☆☆		JavaScript	★★★★☆
MongoDB	★★☆☆☆		React JS	★★☆☆☆
Node JS	★☆☆☆☆			

EXPERIENCE

Nuchange Informatics, Bangalore — *QA ENGINEER*

SEPTEMBER 2019 – MAY 2020

- Automated test cases for the Product using Vanilla JavaScript in Cypress.
- Developed web pages for the Product using HTML, CSS and JavaScript.
- Gathered requirements from the clients and bridged the gap between clients and the organisation, helping them build systems which solved their business needs.
- Provided onsite training for the clients.
- Wrote User Manuals and Release Notes for the projects which helped clients walk through our application with ease.
- Performed Smoke, Functional, Regression, Sanity & AD-hoc testing to ensure the software meets the specified requirements and quality.
- Explored and implemented various open source tools which optimized the process.
- Created and executed the test cases on Qase, a test case management tool. Also, reported defects on Redmine, a defect management tool.
- Trained and mentored new team members on testing procedures, product specifications and company policies which significantly improved their productivity and reduced the managers work-load.

Pole To Win, Bangalore — *Game QA Engineer*

MARCH 2018 - JULY 2019

- Performed Smoke, Functional, Regression, Compatibility, Sanity and AD-hoc testing on a number of social media instant games to ensure the product meets the specified requirement and quality.
- Involved in daily scrum meetings, planning and executing milestones.
- Prepared Daily, EOD, Weekly and Vendor reports for clients which helped the clients stay up to date on the status of work.
- Created and executed the test cases on TestRail, a test case management tool. Also, reported defects, created custom filters and dashboards for bug tracking on JIRA.
- Trained and mentored new team members on testing procedures, product specifications and company policies which significantly improved their productivity and reduced the managers work-load.
